

YASOLVANE

Multipurpose cold degreaser

USES

Multipurpose degreaser. Cleans engines, mechanical parts and industrial floors in cold conditions. Its formula is based on an emulsifiable solvent, which offers highly effective wetting properties to easily remove fatty deposits, after a simple rinse with water.

MAIN PHYSICAL DATA

	METHOD	Values
Density (kg/m ³) at 20°C	ASTM D4052	817
Appearance	Visual	liquid
Colour	Visual	Light yellow
Cleveland Open Cup Flash Point (°C)	ASTM D92	70

The data given in this table represents typical production values and should not be taken as specifications.

PROPERTIES & ADVANTAGES

- ▶ Good wettability, detergent, dispersing and emulsifying properties.
- ▶ Forms a “milky” emulsion when in contact with water.
- ▶ Degreaser for use in cold conditions (**do not use** in hot conditions).

INSTRUCTIONS FOR USE

▶ Small mechanical parts

Immerse in the product for 15 to 20 minutes, drain and rinse with water, then dry with an air compressor blow gun.

▶ Large mechanical parts

Spray the product on the parts and let it penetrate for 15 to 20 minutes, then brush (if necessary) and rinse with a water jet.

▶ Passenger car, agricultural and leisure boat engines

Protect electrical circuits with plastic film, then apply the product with a brush or gun. Wait for 15 to 20 minutes, rinse with water and dry with an air compressor blow gun.

PRECAUTIONS FOR USE

Before use, carefully read the safety label on the packaging and/or check the Health and Safety Data Sheet available at yacco.com.

- ▶ **Do not** dispose the product and rinse water into the environment
- ▶ **Do not** use in degreasing machines designed for use with alkaline detergent.
