

FOGGING OIL

Protects against engine corrosion during storage

USES

YACCO FOGGING OIL is recommended for a proper winter storage for your seasonal vehicles. It coats internal 4-stroke and 2-stroke gasoline engines components to prevent rust and corrosion when the vehicle is stored for long periods of time.

Suitable for many uses such as marine, agricultural and gardening equipment, classic cars, quads, snowmobiles...

MAIN PHYSICAL DATA

	Method	Values
Cleveland Open Cup Flash Point	ASTM D92	> 100 °C
Propellant gas		flammable

The data given in this table represents typical production values and should not be taken as specifications.

PROPERTIES & ADVANTAGES

- ▶ Displaces moisture and leaves a long lasting protective coating.
- ▶ Contains effective anti-corrosion additive that provide optimal metal protection against rust and corrosion.
- ▶ Hydrophobic properties ensure effective coating of metal components.
- ▶ Particularly well suited to equipment working in severe marine environment.
- ▶ Running-in properties provide easier starting after long storage periods.
- ▶ Spray nozzle with smart straw allows for upright or upside down application.

INSTRUCTIONS FOR USE

Check the service manual of the equipment and follow the manufacturer's instructions for maintenance. For proper use, spray Fogging oil into the air intake of every cylinder and into the spark plug holes. **Shake well before use.**

PRECAUTIONS FOR USE

Before use, carefully read the safety label on the packaging and/or check the Health and Safety Data Sheet available at yacco.com.
