

# JANTPROP

Car rim cleaner

## USES

JANTPROP has been designed for car rims cleaning.

Dissolves tough dirt, road grime and brake dust on wheel rims and hubcaps. Leaves rims looking like new.

## MAIN PHYSICAL DATA

	Methods	Units	Values
Appearance	Visual		Limpid
Colour	Visual		Yellow
Density at 20°C	ASTM D4052	kg/m <sup>3</sup>	1060
pH (undiluted)			13.3
Biodegradability (compliant with applicable regulation)			Yes

*The data given in this table represents typical production values and should not be taken as specifications.*

## PROPERTIES & ADVANTAGES

- ▶ Aqueous solution with detergents and highly-effective surfactants.
- ▶ Removes brake dust from wheels.
- ▶ Non-aggressive to paints, elastomer, plastic materials and light alloys, provided that surfaces are thoroughly rinsed with water
- ▶ Gives tarnished rims back their original shine.

## INSTRUCTIONS FOR USE

1. Spray directly on to the surface of the rim. Insist on extremely dirty spots.
2. Wait for around 3 minutes.
3. Thoroughly rinse with water.

## PRECAUTIONS FOR USE

- ▶ Do not use or test on special rims (tuning rims, polished rims, those with alloys or special finishes, etc.).
- ▶ Do not use on motorcycles or quads, instead use YACCO MOTOWASH.
- ▶ Do not store at temperatures below -10°C: when it is cold the product may crystallize, but will regain its clear appearance and effectiveness when the temperature returns to above 0°C. Before use, carefully read the safety label on the packaging and/or check the Health and Safety Data Sheet available at [yacco.com](http://yacco.com).
- ▶ Avoid contact with eyes and skin.
- ▶ Use protective eyewear and rubber gloves.
