

ANTIFUITE RADIATEUR

Radiator stop leak

USES

Designed to stop small leaks in cooling systems.
Suitable for all vehicles, including cars, lorries, heavy-duty construction equipment, buses, industrial equipment, etc.

MAIN PHYSICAL DATA

	Method	Units	Values
Appearance	Visual		Liquid
Colour	Visual		Colorless
pH			11.5
Density at 20°C	ASTM D4052	kg/m3	1050

The data given in this table represents typical production values and should not be taken as specifications.

PROPERTIES & ADVANTAGES

- ▶ Seals internal leaks in cooling systems such as radiators, water pump gaskets, engine blocks and cylinder heads.
- ▶ Stops leaks in 10 minutes.
- ▶ Provides a long-lasting solution.
- ▶ Resists vibrations and heat.

INSTRUCTIONS FOR USE

1. Let the engine reach running temperature.
2. Put the heater up to maximum. Pour the product into the radiator.
 - Use one dose for passenger cars/light-duty vehicles.
 - Use two doses for buses, heavy-duty vehicles and off-road vehicles.
