Heavy-duty workshop hand cleaner

USES

YACCO heavy-duty hand cleaner is a workshop soap containing tiny scrubbing beads. It is recommended for professional use in garages, transport depots, engineering workshops, warehouses, gardens, building sites, general industry and wherever hands get heavily soiled. It is ideal for removing grease, grime, dirt, oil, wet paint, glue, tar, soot and carbon...while protecting the skin.

MAIN PHYSICAL DATA

	Method	Values
Aspect	Visual	Gel
Colour	Visual	Yellow
pH at 20°C		8.5
Fragrance		Citrus

The data given in this table represents typical production values and should not be taken as specifications.

PROPERTIES & ADVANTAGES

- ▶ Conform to AFNOR T73-102 and 1223/2009/CEE Cosmetics Directive, this workshop soap is made according to ISO 9001-2015 standards.
- ▶ Silica-based microbeads of natural origin enhance the cleaning of stubborn dirt and are non-aggressive for the skin.
- ▶ Silica-based composites meet the French regulation n°2017-291 and avoid plastic microbeads to be rejected in the environment.
- ▶ Leaves your hands soft and lightly scented.

HOW TO USE

Apply onto dry hands, rub in well until all the dirt and grease has been loosened. Rinse thoroughly with water. Ensure that hands are dried.

PRECAUTIONS FOR USE

Store in original container tightly closed, in a cool and dry place. Keep away from cold temperatures. Best before date: see on bottom.
