

CRYOGRIPP

Cryogenic penetrating oil

USES

Penetrating action is strengthened by thermal shock at -30°C , shrinking pieces for easier removal of seized parts and threads.

CRYOGRIP also lubricates and protects processed parts. Suitable for a wide range of uses: cars, light commercial vehicles, transportation, agricultural and construction equipment, motorcycles, marine and industrial equipment...

PROPERTIES & ADVANTAGES

- ▶ Produces thermal shock to break contact between surfaces that have seized together.
- ▶ Deep penetrating oil which reaches deep into rusted parts.
- ▶ Loosens seized or rusted parts, such as nuts, bolts, door hinges, shafts, pulleys, etc.
- ▶ Good lubrication properties improve the movement of parts and effectively lubricate all micro mechanisms.
- ▶ Excellent protection against corrosion, even in damp environments.
- ▶ Dissolves grease and tar.

INSTRUCTIONS FOR USE

Shake the aerosol well before use. Spray about 20-30cm from the parts for 15 seconds. Wait for 3 to 5 minutes and then remove the parts. Repeat if necessary.

PRECAUTIONS FOR USE

Before use, carefully read the safety label on the packaging and check the Health and Safety Data Sheet available at yacco.com.
