

DEGRIPPANT 6 EN 1

6-in-1 multi-action lubricant: loosens, protects, lubricates, repels moisture, fights corrosion and removes tar

USES

YACCO DEGRIPPANT 6 EN 1 is a multipurpose lubricant for curative and preventive use. Loosens, lubricates, repels moisture, protects from corrosion by leaving a long-lasting protective film and removes tar.

Recommended for loosening and lubricating, particularly for equipment which is stored for long periods of time or is exposed to corrosive environments (coastal, marine, etc.).

Also suitable for many uses such as cars, heavy-duty equipment (construction, agriculture, etc.), pleasure boats, motorcycles, industrial equipment, etc.

MAIN PHYSICAL DATA

	Method	Values
Density at 20°C	ASTM D4052	825 kg/m ³
Viscosity at 40°C	ASTM D445	3 mm ² /s
Cleveland Open Cup Flash Point	ASTM D92	>80°C

The data given in this table represents typical production values and should not be taken as specifications.

PROPERTIES & ADVANTAGES

- ▶ Highly effective formula designed to meet the requirements of the French Navy.
- ▶ Deep penetrating oil loosens and lubricates.
- ▶ Excellent protection against corrosion, even in damp environments.
- ▶ Various additives combined with solvents and specific lubricating base stock ensure effective curative treatment of seized parts.
- ▶ Anti-wear additives combined with specific lubricating base stock significantly reduce wear on moving parts.
- ▶ Removes tar on car sills, lorry chassis, trailers, etc. For special paint or fragile surfaces, first test on a hidden spot for colour fastness.

INSTRUCTIONS FOR USE

Shake the aerosol well before use. Spray evenly on the surface to be treated. Wait for a few minutes and repeat if necessary.

On very rusted parts, wait for 1 hour or more before repeating.

PRECAUTIONS FOR USE

Before use, carefully read the safety label on the packaging and/or check the Health and Safety Data Sheet available at yacco.com.
