

CURATIF DIESEL

Diesel fuel additive

UTILISATIONS

YACCO diesel fuel additive has been specially designed to keep clean the fuel system, the injectors, the valvetrain and the combustion chambers in diesel engines.

Suitable for all diesel engines, including those fitted with turbo and direct injection: passenger cars, industrial vehicles/equipment (lorries, generator sets, etc.), construction and agricultural equipment, fishing boats and pleasure boats. Suitable for any type of diesel fuel (off-road diesel, domestic fuel oil).

MAIN PHYSICAL DATA

	Method	Units	Values
Appearance	Visual		limpid
Colour	Visual		yellow
Density at 20°C	ASTM D4052	kg/m3	885

The data given in this table represents typical production values and should not be taken as specifications.

PROPERTIES & ADVANTAGES

- ▶ Ashless formula improves combustion, reduces pollutant emissions and boosts fuel economy (up to 3% in service).
- ▶ Significantly reduces black exhaust smoke, as measured by MOT test.
- ▶ Protects the injection system from rust and corrosion.
- ▶ Dispersants keeps injectors clean, extending their service life.
- ▶ Increases the cetane number by 2 to 3 points.
- ▶ Anti-foaming properties in hydrated and non-hydrated fuel.

INSTRUCTIONS FOR USE

1 dose of 250 ml for a 40 to 60 L fuel tank

For clogged fuel system : 2 doses of 250 ml for a 40 to 60 L fuel tank

For bulk storage, add 5 L of CURATIF DIESEL for a 1000 L fuel tank.

Remark. : To ensure CURATIF DIESEL mixes properly with fuel, we recommend you pour it in half way through filling up.
