

# PREVENTIF DIESEL

Diesel fuel additive, preventive treatment

## USES

**YACCO PREVENTIF DIESEL** is specially designed to prevent sludge, dirt and carbon build-ups in all types of diesel engines (passenger cars, light commercial vehicles) including modern ones fitted with injection systems (common rail, pump injectors, direct injection) and particulate filters. Used regularly, YACCO PREVENTIF Diesel cleans and keeps clean the injection pump, injectors, combustion chambers, turbo and EGR valves. This maintains the vehicle at maximum efficiency and extends the lifespan of its parts.

## MAIN PHYSICAL DATA

	METHOD	Values
Appearance		Clear
Colour		Yellow
Density at (kg/m <sup>3</sup> )	20°C ASTM D4052	874

*The data given in this table represents typical production values and should not be taken as specifications.*

## PROPERTIES & ADVANTAGES

- ▶ Prevents build-ups of deposits inside all types of diesel engines, equipped with common rail, injector pumps or direct injection.
- ▶ Compatible with particulate filters.
- ▶ Lubricates and protects fuel pump and injectors.
- ▶ Increases the Cetane number for easier start-up and reduces engine noise.
- ▶ Helps to reduce fuel consumption, as well as CO<sub>2</sub> and pollutant emissions.
- ▶ Improves water dispersion and prevents its accumulation in the tank.
- ▶ Helps to reduce the tendency of diesel to foam.

## INSTRUCTIONS FOR USE

### Treatment in the vehicle tank:

- ▶ 1 bottle of 250 ml treats from 40 to 60 L diesel fuel
  - ▶ To ensure PREVENTIF DIESEL mixes well with the fuel, preferably pour half way through filling.
- Use regularly for maximum efficiency.
