

FORK FLUID 20W

FORK FLUID

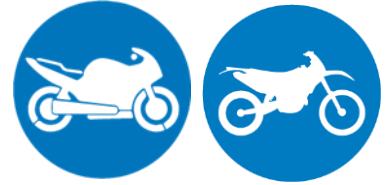

USES

Fork oil 20W provides firmer damping than the original fluid.

Suitable for conventional forks with frequent duo riding or high mileage suspension by helping to compensate overdamping of tired springs.

This fluid is part of our YACCO FORK FLUID product range.

For softer damping, use FORK FLUID 2.5W, 5W, 7.5W, 10W or 15W, depending on your personal requirements.

MAIN PHYSICAL DATA

		Methods	Units	20W
Density at	20°C	ASTM D4052	kg/m ³	877
Kinematic viscosity at	40°C	ASTM D445	mm ² /s	68
Kinematic viscosity at	100°C	ASTM D445	mm ² /s	11
Viscosity index		ASTM D2270		153
Pour point		ASTM D97	°C	-33
Cleveland Open Cup Flash Point		ASTM D92	°C	210

The data given in this table represents typical production values and should not be taken as specifications.

PROPERTIES & ADVANTAGES

- ▶ High-shear, stable, multi-grade fluid which provides progressive operation of the suspensions.
- ▶ High-viscosity fluid for uses where firm damping or high temperature service conditions are required.
- ▶ Very good damping effect under all operating conditions.
- ▶ Excellent anti-foam, anti-wear, anti-corrosive and anti-friction properties.
- ▶ Protects O-rings.
- ▶ Compatible with fork oil seals.
