

# AIR FILTER OIL

Oil for foam air filters

## USES

AIR FILTER OIL is designed to prevent clogging of road and off-road motorcycle engines equipped with a foam air filter.

Tested and proven to be effective in competition, this product is suitable for leisure and racing.

It can also be used with foam air filters on gardening equipment.

## PROPERTIES & ADVANTAGES

- ▶ Excellent power to impregnate foam.
- ▶ Provides very effective protection against dust, mud, sand and any other kind of outdoor pollution.
- ▶ Significantly decreases general engine wear.
- ▶ Keeps engine parts clean even after severe driving conditions.
- ▶ Extends the engine's service life.
- ▶ Dyed blue for easy detection on the surface of the filter.

## INSTRUCTIONS FOR USE

1. Clean the filter with a solvent suitable for foam air filters (do not use gasoline).
2. Let the filter dry.
3. Gently spray AIR FILTER OIL directly on the foam.

## PRECAUTIONS FOR USE

Not for use on paper filters.
