

MULTIP PLUS

Extreme-pressure lithium grease

USES

This grease is recommended for all vehicle parts, including ball bearings, cardan shafts and joints...

This multipurpose extreme-pressure grease is suitable for many different uses, particularly under conditions involving heavy loads and high temperatures.

It can be used in cars, motorcycles, agricultural and construction equipment, industrial vehicles, off-road vehicles, etc.

Effective between -20°C and +120°C (max. temperature 140°C).

Specifications:

NLGI grade 2

ISO 6743-9 → ISO-L-XB

CHB 2

DIN 51502 → DIN KP2P-20

MAIN PHYSICAL DATA

	NLGI grade 2
Colour	Amber
Drop point	>190°C
Thickener	Lithium
Weld load	315kg

The data given in this table represents typical production values and should not be taken as specifications.

PROPERTIES & ADVANTAGES

- ▶ Excellent extreme-pressure properties.
- ▶ Good anti-wear and anti-rust protection.
- ▶ Very good thermal resistance for a lithium-based grease.
- ▶ Good water resistance even in boiling water.
- ▶ Enhanced protection against oxidation.
