

ATF X FE

Fuel Economy synthetic fluid for automatic transmissions

USES

100% synthetic fluid for automatic transmissions and power steering systems in passenger cars and light commercial vehicles.

Particularly recommended for multi-speed automatic gearboxes (up to 8 and 9 speed transmissions) requiring a low viscosity ATF for better fuel economy and lower CO2 emissions.

Specifications:

YACCO ATF X FE meets the specifications of the main OEMs and covers a wide range of uses (see table on page 2).

MAIN PHYSICAL DATA

		Method	Units	X FE
Density at	20°C	ASTM D4052	kg/m ³	845
Kinematic viscosity at	40°C	ASTM D445	mm ² /s	27
Kinematic viscosity at	100°C	ASTM D445	mm ² /s	6.3
Viscosity index		ASTM D2270		197
Pour point		ASTM D97	°C	-60
Cleveland Open Cup Flash Point		ASTM D92	°C	200
Colour		Visual aspect		blue

The data given in this table represents typical production values and should not be taken as specifications.

PROPERTIES & ADVANTAGES

- ▶ Optimized friction coefficient for a smooth operation of the gearbox over the service life of the fluid.
- ▶ High viscosity index ensuring perfect lubrication at low and high temperatures.
- ▶ The low pour point provides good performance in cold conditions and instant lubrication upon start-up.
- ▶ 100% fully synthetic formula with excellent thermal stability (increased oxidation resistance), thus prolonging the service life of the oil.
- ▶ Non-aggressive to seals, as well as ferrous and non-ferrous materials used in modern transmissions.
- ▶ A low-viscosity fluid designed to increase fuel economy by reducing fluid resistance within the transmission. Fuel economy can be further improved with the use of Fuel Economy engine oil.
